TO EMPOWER YOU!**

Do not miss the biggest wealth transfer in human history

Every new economic revolution has started with a crisis !

“In the midst of chaos, there is also opportunity.”
Sun Tzu

DISCLAIMER ON LIMITATION OF LIABILITY

These internal working materials are exclusively intended for informative purposes

In particular, the enclosed information should not be considered as a financial, commercial, investment, legal or any other type of proposal or offer. This information should also not be taken as a call-to-action or an urge to utilize the described services. Any decisions on the use of these materials should be made independently.

Minting of Coins and Token

Through a so-called minting (technical process), via delivered hardware or hardware which is maintained and serviced for the user in the course of a so-called "In-house Minting", users have the opportunity to mint coins or tokens. From a legal point of view, all minted coins and tokens of the following projects are payment coins or tokens. No liability or guarantees can be assumed for the price development of these coins or tokens on crypto exchanges, as price developments of cryptocurrencies are dependent on multiple market influences.

Time Halving & Sales Halving

With a so-called time halving & sales halving, the total number of minted coins can differ from masternode to masternode (hardware / processor for minting coins). Basically, the later a masternode is activated for the minting process, the lower the total number of minted coins. Therefore, before you consider a possible purchase of a masternode, check whether the number of coins still to be minted by this is fair to your decision.

Cryptocurrency trading is inevitably linked with certain risks, highly speculative, and may lead to partial or total losses in the prices of cryptocurrencies at your disposal.

We strongly recommend you to make informed decisions on trading, investing or exchanging cryptocurrencies, relying on professional consultations as needed. Make sure to verify the services offered by the companies indicated in these materials before using their products - installing, registering, purchasing, or using these products for trade and investment purposes.

Please note that the information contained in this presentation is subject to change, which means that important aspects of the project can be changed or abandoned at any time.

Staking

So-called staking promotions represent blockchain and crypto projects whose indicators allow a high probability of success. However, since these are third-party projects, SAFIR is not responsible for the respective project itself, nor does SAFIR have any influence on whether the respective project is successfully implemented or not.

Therefore, no guarantees or promises can be made. We therefore strongly recommend that you inform yourself independently and on your own responsibility before making any decision in this regard.

Forecast

Forecasts are based on previous developments. These therefore do not represent any promises or guarantees. Changing market conditions or unforeseeable events which are outside of the company's own degree of effectiveness can influence future developments to a small or large extent.

RISK ASSOCIATED WITH CRYPTOASSETS

Things to know before buying cryptoassets or related products and services

Extreme Price Fluctuations

Many cryptoassets suffer from sudden and extreme price fluctuations and are speculative in nature, as their price is often based solely on consumer demand (i.e., there may be no asset backing the project or other tangible value). You can lose a large amount of money or even all the money you have invested. Extreme price fluctuations also make many cryptoassets unsuitable as a store of value or as a medium of exchange or payment.

Misleading Information

Some cryptoassets and related products are advertised to the public in an aggressive manner, using marketing material and other information that may be unclear, incomplete, inaccurate or even deliberately misleading. For example, social media advertising may be very brief and focus only on the potential gains and not on the high risks. You should also be wary of social media influencers who typically receive a financial incentive to market certain cryptoassets and related products and services, so their communications may be biased.

Fraud And Malicious Activity

There are numerous fake cryptoassets and scams whose sole purpose is to deprive you of your money through the use of various techniques, such as phishing.

Product complexity

Some products offering exposure to cryptoassets are very complex and sometimes have features that can increase the magnitude of losses if adverse price fluctuations occur. Given their complexity, these products are not suitable for many consumers.

Lack of Protection

Most cryptoassets and the sale of related products or services are not regulated in most jurisdictions. In these cases, you will not enjoy the rights and protections available to consumers of regulated financial services, such as complaint or redress mechanisms.

Market Manipulation, Lack of Price Transparency and Poor Liquidity

The pricing of cryptoassets and the execution of transactions on the platforms are often not transparent. In addition, the holding of certain cryptoassets is highly concentrated, which may affect prices or liquidity. Therefore, you may not get a fair price or deal when buying or selling cryptoassets, or you may not be able to sell your cryptoassets as quickly as you would like in the absence of a potential buyer. Market manipulation has been reported on multiple occasions.

Cyber-attacks, Operational Risks and Security Issues

The distributed ledger technology that underpins cryptoassets carries specific risks. Several cryptoassets issuers and service providers, in particular crypto asset exchanges and e-wallet providers, have suffered cyber-attacks and serious operational problems. Many consumers have lost their cryptoassets or suffered losses due to such attacks and service disruptions or lost the private keys with which they access their assets.

WORKING FOR A SYSTEM OR HAVING A SYSTEM THAT WORKS FOR YOU

BLOCKCHAIN AND TOKENIZATION

THE GLOBAL RUN HAS STARTED - WORLDWIDE!

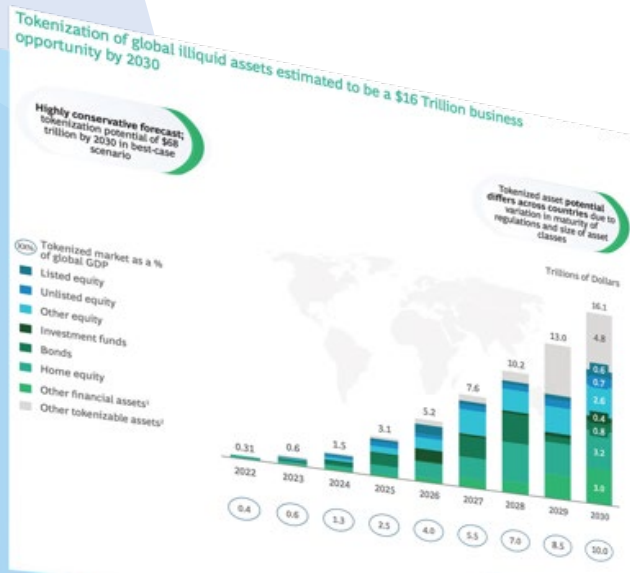

“Tokenization is the process of converting an **asset** or the **ownership rights of an asset** to a **digital share**”

NASDAQ GROWTH

The BCG report indicates that current trends show the total size of tokenized illiquid assets, including real estate and natural resources, could **reach US\$16.1 trillion by 2030**.

The tokenization market is expected to be equivalent to **10% of global GDP by 2030**.*

BlackRock CEO Says 'Next Generation for Markets' Is Tokenization
BlackRock joins a growing number of firms backing the tokenization of securities, despite the CEO's wider crypto cynicism.

TOKENIZATION

“The new revolution, digital shares”

Reasons for Tokenization

- ❏ Project financing
- ❏ Huge savings potential for companies (multi-billion PA globally)
- ❏ 100% transparency and time savings through blockchain technology

What can be tokenized?

- ❏ Real estate
- ❏ Solar plants, wind power etc.
- ❏ Art, paintings, antiques
- ❏ Patents, licenses, contracts for work
- ❏ Assets of raw materials and finances

Be part of the revolution: Digital shares and Tokenization!

Like photos, films, letters, documents, etc., STOCK and STOCK EXCHANGES have now also become DIGITAL. This gives you the opportunity to have “Tokens” of the next potential Apple, Google, Tesla, etc. startup companies.

The tokenization market is expected to be equivalent to 10% of global GDP by 2030

WHAT IS MINTING ?

USER OR PRODUCER? BUILD DIGITAL ASSETS

General information about Minting

- Possibly the most effective way digital assets can be created
- The production of digital assets through minting is much cheaper than e.g. through mining (electricity and hardware costs)
- A highly secure way to participate in the digitization of projects, companies, physical assets, etc. (tokenization)
- In summary, possibly the cheapest and most environmentally friendly way to get hold of digital assets

Minting crypto creates new digital coins or tokens on a blockchain network. Decentralization: Minting allows the creation of a decentralized financial system that is not controlled by any central authority. This provides greater security and transparency while reducing the risk of fraud or corruption.

ZENIQ Community Minting

- ◇ **Verified projects with real intrinsic value and high future potential**
- ◇ Very low electricity consumption "the green mining"
- ◇ ZENIQ Smartchain, unlimited project token minting capacity (access to other industries)
- ◇ Real Time minting on the blockchain (fully decentralized)! NO pre-minted crypto, it's real-time production directly on the blockchain (Validation).
- ◇ Minting directly into your decentralized wallet on the NOMO app
- ◇ Multiple long-term minting results and high potential projects only with our community minting

PORTFOLIO MINTING

Minting with SAFIR gives you the possibility to create DIGITAL SHARES (tokens) of selected and verified **REAL projects & companies** with exceptional growth potential for the future.

The strategy of splitting the own minting power (minting of tokens) across multiple projects increases **healthy diversity** (intelligent MASTERNODE-MIX).

TDRONE

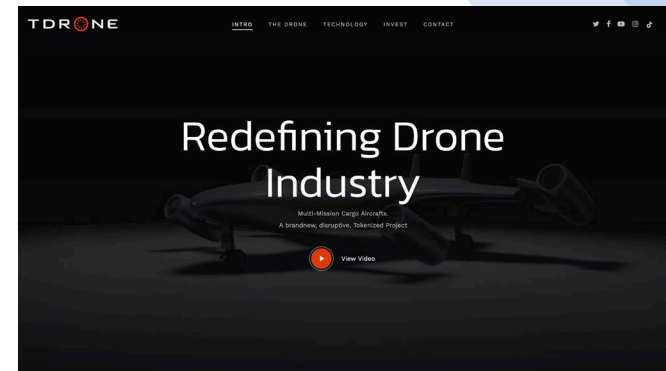

Disruptive drone industry / Multi-mission cargo aircraft

The drone market is expected to grow to 45.8 billion US\$ between 2019 and 2025.

TUPAN

Land purchase and afforestation of the Amazon / Carbon credits trading

In 2022, the market value was US\$10 billion. By 2030, the carbon credit market may be worth more than US\$200 billion.

Example

PORTFOLIO MINTING

Minting with SAFIR gives you the possibility to create DIGITAL SHARES (tokens) of selected and verified **REAL projects & companies** which exceptional growth potential for the future.

The strategy of splitting the own minting power (minting of tokens) across multiple projects increases **healthy diversity** (intelligent MASTERNODE-MIX).

Example

SIDI

REAL ESTATE

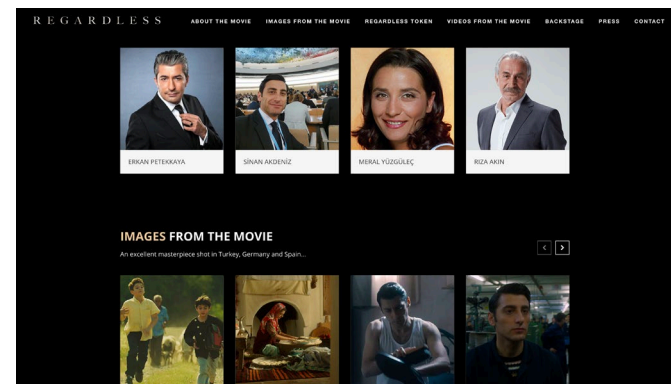

SIDO Immobilien GmbH deals with the acquisition and development of real estate, leasing, the operation of catering and accommodation.

REGARDLESS

First tokenized movie in the middle east.

"Based on a Real Life Story". Starting from an extremely difficult life situation to a successful multi-millionaire. A film to remember your strength!

PORTFOLIO MINTING

Minting with SAFIR gives you the possibility to create DIGITAL SHARES (tokens) of selected and verified **REAL projects & companies** which exceptional growth potential for the future.

The strategy of splitting the own minting power (minting of tokens) across multiple projects increases **healthy diversity** (intelligent MASTERNODE-MIX).

VOO

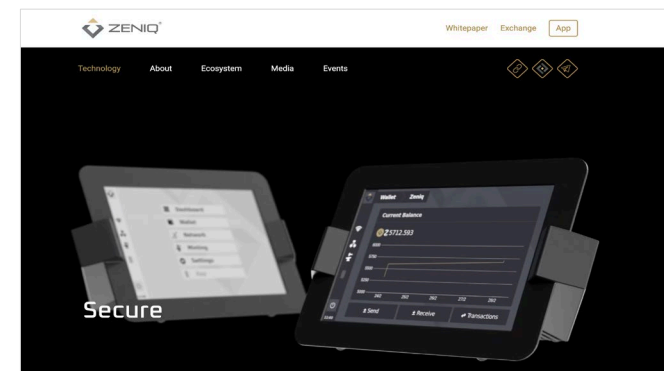

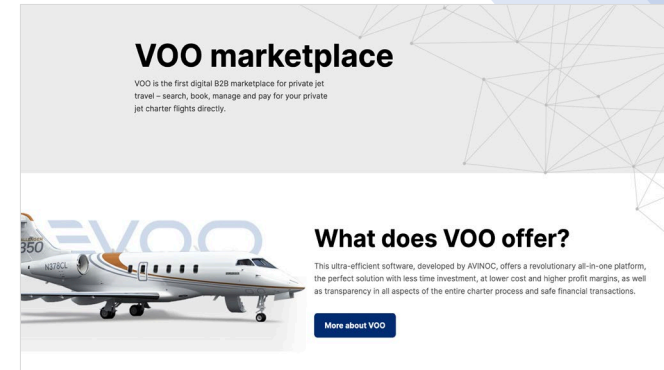

GATEWAY to AIR MOBILITY for ALL.

The market potential due to the focused industries such as Business AVIATION, Commercial Airline, Air Taxi, Drones is US\$ 1 trillion.

ZENIQ

360° Ecosystem. Tokenization & exceptional Blockchain Features

Fully decentralized ecosystem with own Blockchain, Smart-Chain, SWAP, NOMO App, NFT Marketplace, DEX and much more to come!

Example

PORTFOLIO MINTING

LET THE HARDWARE WORK FOR YOU!

Minted "digital shares" (coins or tokens) are generated by the hardware (masternodes) of the respective project (validation process on the blockchain) and can be freely used immediately to withdraw/ spend or hold them in order to benefit from the value developments of the respective projects.

Example

Version: 07/2023, Typing errors, other errors or changes reserved.

*Minted coins and tokens are always listed step by step on different exchanges for each project in order to enable free trade.

NOMO App

THE
DECENTRALIZED
REVOLUTION!

“UN-BANK” YOUR LIFE

- Your personal self-custodial wallet
 - only the owner has the keys
- Sending and receiving digital assets
- Direct minting into your NOMO App
- NFT and staking capability
- ZENIQ Hub integration
- Built-in SWAP
- Crypto debit card integration
- Biometric authentication (Fingerprint)

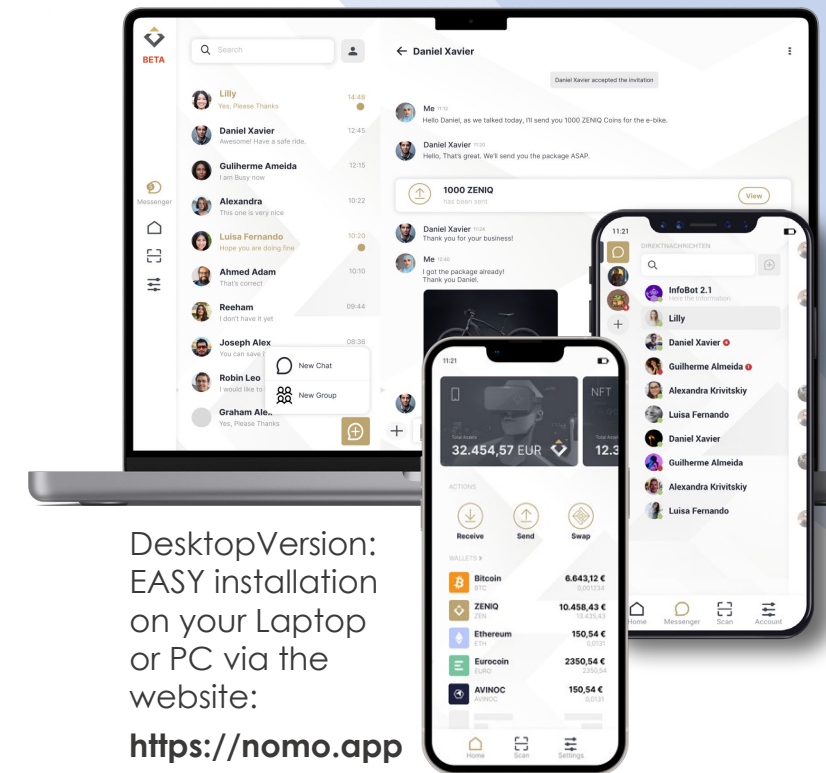

AND - there's more to come!

DECENTRALIZED MESSENGER

- End-to-End encrypted
- 100% decentralized
- Video and voice call capability
- Send pictures, documents...
- Group chat function and group video calls capability
- **NEW: Cryptocurrency send and receive without wallet addresses**

SUSTAINABLE INCOME WITH MINTING

Produce your “digital shares” over years

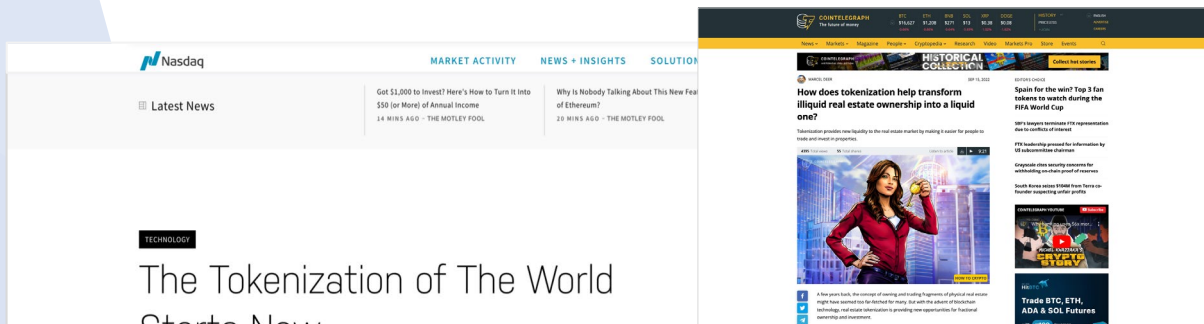

- Hubs (Hardware) are minting tokens 24/7
- Real time minting on the Blockchain (Validation)
- Your assets are under your control
- You can withdraw anytime
- You can exchange it to other crypto currencies anytime

- “Digital shares” of new potential companies & projects
- Staking gives daily rewards in tokens
- 24/7 minting means sustainable income
- Digital Assets (tokens) could prevent loss of buying power (inflation)

BUILT-IN MECHANICS FOR PRICE DEVELOPMENT

HALVING + OTHER MECHANICS

Deflationary minting

The entire Minting process takes place on the ZENIQ Smart Chain, which can be viewed transparently at any time at the web address: <https://smart.zeniq.net>

Time Halving: from the activation/purchase date of the masternode, every year (for example: from the 10th of February to the next 10th of February) there will be 50% fewer minted tokens per day.

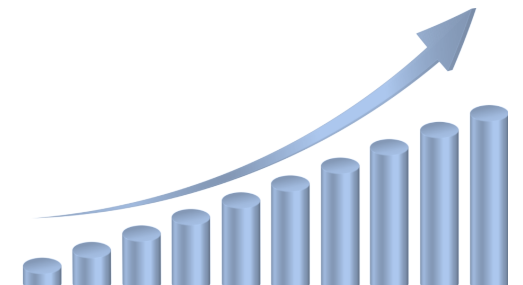

Sales Halving: with each purchased masternode (each project), the minting factor is reduced. As a point of reference, the minting factor is reduced by around 1% for every 2,000 masternodes, according to the algorithm.

Burning & Company Value

BURNING: The main part of the profits made by the respective projects (like TUPAN, SIDI, REGARDLESS, ZENIQ...) is used to buy coins or tokens of the respective project from the market and to "burn" them. This process leads to a constant reduction in the total- and circulating supply, which, with the same or increased market demand, leads to strong support for the price development of the respective digital asset.

Company Value: A company is valued based on market capitalization. Based on an enormous potential of the respective product and thus of the company, an exceptional increase in the company's value can be assumed (like TDRONE or VOO). The TDRONE Token is NOT a stock, but behaves in a similar way.

As a result, the minted digital assets can increase exceptionally in their price valuation on the market over time.

Do not miss the train to the biggest wealth transfer.....

How to enter:

- Register for free (SAFIR.com)
- Get your personal Backoffice (free of charge)
- Choose your Masternode Product Portfolio Pack
- Activate your Minters (Masternodes)
- Start producing your digital Assets 24/7

- Download your NOMO App and connect it with your Backoffice

Be the **MASTER** of your finances again!

**
Forty Percent Clause. The 40% clause states that any single Distribution Line can contribute with a maximum of 40% to a Promoter's Total Performance. This is reported in the SAFIR Backoffice as "Performance".

PROFIT SHARE PROGRAM

+ MONTHLY DIVIDENDS!

SGI

25% OF THE MONTHLY PROFITS of SAFIR Group International Ltd. are paid out proportionately to the SGI Token holders in the form of EURO (SAFIR Backoffice). **MONTHLY PAYOUT**

Up to **5%** OF THE MONTHLY TOTAL PRODUCT SALES of SAFIR Group International Ltd. Token will be used to buy back Profit Shares (SGI) from the market to support the token price development.

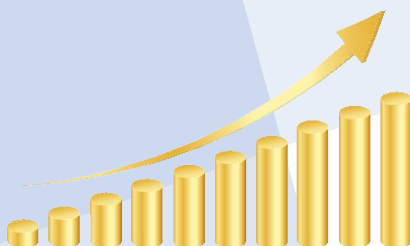

Monthly dividend payments for beneficiaries holding Profit Shares in the SAFIR Backoffice and/or on the NOMO App. **Means:** the more Profit Shares (SGI Tokens) a User has/holds, the higher the proportion of the 25%!

PROFIT SHARE PROGRAM

+ MONTHLY DIVIDENDS!

SGI

3 Options

- 1 Sell/exchange your SGI and get, *as usual*, BTC, ETH or others* 
- 2 Change your “one time earning” to a “LIFE TIME” earning
- 3 Let your Profit Shares grow with SAFIR #1 and benefit twice: price development of Profit Shares + monthly dividends!

Fast Start INCENTIVE

Start building your network powerfully and **get massive additional rewards!**

**GO SAPHIRE
IN 40 DAYS**

The FAST START PROGRAM extends over a total of 40 days - from the moment of the account's upgrade to Promoter. For each Career Rank which is achieved within this timeline, the respective Promoter receives an additional Fast Start Incentive.

*The Fast Start Incentives are paid out in real time (50% in Euro + 50% in I♥SAFIR Token) to the eligible Promoter's Backoffice Account.

*Fast Start Program starts in the moment of the upgrade to Promoter (free of charge)
